FOR IMMEDIATE RELEASE:

Chamber Sponsors Second Trip of a Lifetime China Tour

China, a 5,000-year-old civilization, has always been one of the most exotic and intriguing destinations for travelers. Its rich cultural heritage – which includes the invention of moveable type, astronomy and spaghetti – has shaped world history. Today, China is an economic powerhouse that will continue to shape the world's future. Its unique business systems are ever evolving; its influence on the global markets grows daily. Any true understanding of China must encompass both its cultural history and its contemporary position as a business leader.

In April 2009, seventy-three people traveled to China through the first trip sponsored by the Greater Akron Chamber. The inexpensive and all-inclusive opportunity allowed participants to experience beautiful attractions filled with the richest cultures China has to offer, as a hands-on experience to learn their customs and culture. "China is a fascinating country which is propelling itself into the 21st Century," said one participant. Jeff Murphy, who went on the trip, added, "Our group learned a tremendous amount of the remarkable history of the country, its people and the nature of its economy and culture."

The Greater Akron Chamber is once again offering its members, family, friends, and others an opportunity to immerse themselves in the study of both the culture and business life of this unique country. The 9-day excursion, from October 16-24, 2009, promises to be the educational adventure of a lifetime. Under the guidance of Citslinc International Inc., the Chamber has designed this trip to include not only sightseeing at some of the world's most famous landmarks – including The Great Wall, Tiananmen Square, the Forbidden City and the Ming Emperor's tombs – but also the country's centers of commerce. Participants will visit not only Beijing, the capital and home to the most recent Olympics, but also Suzhou, Hangzhou and Shanghai, the mainland's financial and business center. There, travelers will tour the Pudong Economic Development Zone to learn about the manufacturing and financial models that fuel its worldwide success.
